

STEFANO INGLESE, MDT

CURRICULUM VITAE

After completing his degree in Dental Technology, Stefano Inglese pursued his strong interest in high-accuracy esthetic and functional of dental restorations, concentrating on dental ceramics.

Stefano Inglese has perfected his technique and precision in esthetic, function and biological integration due to this passion for the artistic and scientific aspects of his profession and the participation in numerous courses and work experiences with renowned master technicians and clinicians abroad.

He is the owner of a dental laboratory in Pescina (Aq), Italy. In 2003, he won the second prize in the “Occlusal compass” International competition for dental technicians and the first prize for the best scientific and photographic documentation.

He is a member of Oral Design and is an active member of IAED (Italian Academy of Esthetic Dentistry). Stefano Inglese writes for national and international dental publications, such as QDT (Quintessence of Dental Technology) 2012, 2014 and 2018 as well as for Quintessenz Zahntechnik.

He and Dr. Anthony Sclar contributed to the book “Interdisciplinary Treatment Planning II”, edited by M. Cohen. He lectures at international conferences and collaborates with internationally renowned clinicians in Italy and abroad.

Stefano Inglese is the author of the book “Aesthetic dental Strategies”, published by Quintessence Publishers in 2013 and currently available in Italian, English, Chinese and Russian version.
